

Homework Leaflet

Year I Spring 1st Half 2025

Homework project due in by: 13th March 2025

Children work hard at school and they need time in the evenings and weekends to play and learn in different ways. They need time to take part in family activities and also to be able to join community organisations and teams.

Homework is of most benefit to the learner when it is a chance to:

- Talk about learning with parents and carers
- Apply learning in a practical context
- Spend time on practising facts and skills that need a lot of repetition
- Make choices and decisions

Essential Weekly Homework

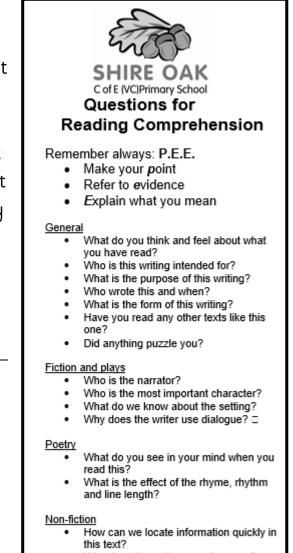

These three homework tasks should be done every day or as often as you possibly can:

1. <u>Reading</u>

Children in KST and some children in lower KS2 have a <u>school reading book</u>. They start by reading to their grown-ups who will write a comment in the reading journal. As children get more confident it may be that instead they discuss the book with an adult who can ask them questions about what they Our Reading Comprehension have read. can help with thinking of bookmark questions.

Children will also bring home a <u>school library</u> <u>book</u> that they have chosen to read for information or pleasure.

Children can also read their <u>own books</u> from home or the local library. To choose a book that is the right level of difficulty when children are still learning to read ask them to put down one finger for each word they can't work out on a page. O fingers is too easy, 5 is too hard. 3 is probably just about right.

· Why does the author use diagrams?

2. Practising Key Number Facts

Learning key number facts off by heart will help children become more confident and fluent in mathematics. These could be learnt by memorising, and they could also be practiced in fun ways e.g. by playing games. You can also find lots of activities to practise these facts on websites including <u>https://www.topmarks.co.uk/maths-games/daily10</u>. The White Rose Maths App is also a useful tool.

Key Number Facts for Year I:

- One more and one less than number to 10 and then 20.
- Doubles of numbers to 5.
- Addition facts to 10.
- Add and subtract one-digit numbers to 10, including zero.
- Count to and across from 20 and then to 100, forwards and backwards, beginning from any given number.
- From the Summer term learning to count in 2s, 5s and 10s.
- 3. Learning Sounds and Spellings

Children will continue to learn sounds and Red Words in their daily phonics sessions. Their sound books will be updated each week with the sound we have been learning. The children also bring the phonics sheets from their sessions on a Monday, Tuesday and Wednesday. A sound mat and Red Word mat were sent home last term. As the children progress through Year I, they will also be expected to spell some of these Red Words correctly, as well as be able to read them. It would be good for the children continue to learn to spell the Red Words on the Red Word mat sent home last term.

Optional Half Termly Homework

If your child needs more ideas for things to do at home, try these:

- I. Talk to the grown-ups in your family about the toys that they enjoyed playing with when they were children. Choose a way to record this information.
- 2. We are learning about materials in science. Can you go on a material hunt and identify which materials the objects are made from?
- 3. In our geography sessions we will be learning about the four countries of the UK (England, Scotland, Wales and Northern Ireland) and their capital cities. Can you look at a simple map and find places in the UK you may have visited or have family or friends living in? Can you present what you find in a creative way?

Don't forget that telling a grown up about their learning and explaining new knowledge and skills is the very best homework a child can do!

<u>Big Half Term Project</u>

Children should use their own ideas and skills for this because we want them to build stamina over a period of time and to be creative in how they respond. They can work with help or independently. This work will be shared in class and certificates will be awarded for projects that are completed well.

Choose any of the activities suggested above or any of your own 'toys' themed ideas and turn it into a bigger project. Present your learning in any way you choose including drawing, making, photographing, writing or even baking!
