

Homework Leaflet

Year 5

Autumn 2

Name:

Homework project due in by:

Thursday 18 January

Children work hard at school and they need time in the evenings and weekends to play and learn in different ways. They need time to take part in family activities and also to be able to join community organisations and teams.

Homework is of most benefit to the learner when it is a chance to:

- Talk about learning with parents and carers
- Apply learning in a practical context
- Spend time on practising facts and skills that need a lot of repetition
- Make choices and decisions

Essential Weekly Homework

These three homework tasks should be done every day or as often as you possibly can:

1. Reading

Children in KS1 and some children in KS2 have a school reading book. They start by reading to their grown-ups who will write a comment in the reading journal. As

children get more confident it may be that instead they discuss the book with an adult who can ask them questions

SHIRE OAK

Questions for Reading Comprehension

Remember always: P.E.E.

- Make your *point*
- Refer to *evidence*
- Explain what you mean

General

- What do you think and feel about what you have read?
- Who is this writing intended for?
- What is the purpose of this writing?
- Who wrote this and when?
- What is the form of this writing?
- Have you read any other texts like this one?
- Did anything puzzle you?

Fiction and plays

- Who is the narrator?
- Who is the most important character?
- What do we know about the setting?
- Why does the writer use dialogue? □

Poetry

- What do you see in your mind when you read this?
- What is the effect of the rhyme, rhythm and line length?

Non-fiction

- How can we locate information quickly in this text?
- Why does the author use diagrams?

about what they have read. Our Reading Comprehension bookmark can help with thinking of questions.

Children will also bring home a school library book that they have chosen to read for information or pleasure.

Children can read their own books from home or the local library. To choose a book that is the right level of difficulty when children are still learning to read, ask them to put down one finger for each word they can't work out on a page. 0 fingers is too easy. 5 is too hard. 3 is probably just about right.

2. Practising Maths

Learning key number facts off by heart will help children to be more confident and fluent mathematicians. These could be learnt by memorising, and they could also be practised in fun ways e.g. by playing games. You can also find lots of activities to practise these facts on websites including

<https://www.topmarks.co.uk/maths-games/daily10>

Key number facts for Year 5

x table facts – We are concentrating on the 6 x tables this term and how knowing the 3 x table helps with this.

-Doubles of any 2-digit number

-Halves of any even 2-digit number

-Addition and subtraction facts to 100

-(Squares of numbers between 1 and 12 – at appropriate time once taught)

3. Learning sounds and spellings

Children will have spellings to practise most weeks that will be checked in school and used in class work. These may be related to:

- phonics sounds they are learning
- key words that they need to know off by heart
- spelling rules they are learning
- tricky words that are exceptions to the rules
- topic and other subject related vocabulary

A good way to learn spellings is LOOK, SAY, COVER, WRITE and CHECK.

Optional Half Termly Homework

If your child needs more ideas for things to do at home try these:

1. maths activity. We are working on all aspects of fractions this term. When are you seeing fractions in your life? Do you see fractions being used at home, when you are out for a walk or even at a birthday party. You could note down when you see them, draw them or even get someone to take a photograph for you. (For methods that are unfamiliar to adults who are helping there are often videos on the Internet that explain the technique or you can ask the teacher for advice.)
2. writing activity. In RE we are thinking about why some places and journeys are special. Interview some members of your family and find out which places and journeys are special to them.
3. reading activity. Once you have finished your current reading book at home use your school email to recommend it to a friend in class.
4. useful websites or online activities

Don't forget that telling a grown up about their learning and explaining new knowledge and skills is the very best homework a child can do!

Big Half Term Project

Children should use their own ideas and skills for this because we want them to build stamina over a period of time and to be creative in how they respond. They can work with help or independently. This work will be shared in class and certificates will be awarded for projects that are completed well.

In science this term we have been investigating all manner of solids, liquids and gases (SLG). What can you find out about this area of science to amaze us in class. SLGs are all around us in everyday life so think about how you could use everyday resources to showcase your knowledge.
